

The Smarter Move

**...FOR EPA-REGULATED GOODS
AND AGRICULTURAL CHEMICALS**

HARVEST OUR EXPERTISE

Let Alba Wheels Up streamline your multi-phased import and export of hazardous cargo, including pesticides, agrichemical and crop protection.

EPA-regulated goods, especially agricultural chemicals and pesticides, require experience and in-depth knowledge. Alba Wheels Up understands and navigates these regulations with care and experience at a high level.

Our team is on top of the developments and changes in EPA and CBP regulations, with direct relationships with the regulatory agencies pertaining to imports.

As usual, Alba Wheels Up is “on it” as an early adopter and test filer on the EPA notice of arrival (NOA) pilot. Our pesticide clients are currently paperless in every EPA region, facilitating deliveries to industrial mixing sites and distributors across the U.S. in an ultra-compliant manner.
